We create the schools our communities deserve.

Money is finally coming to our schools.

The “Local Control Funding Formula” in the state budget will make sure that most of that money goes to the districts that need it most. It gives school districts full control on how to spend the new money. It’s our opportunity to show how all students need the essential services and supports we provide to succeed in school. We make sure students learn in clean, safe, and supportive schools.
